Drive the road of change
IVECO
eDAILY
Free a **new energy**.
eDAILY. JUST ELECTRIC

The same Daily you are used to.
Just electric.

Jump into the future with the peace of mind of working with a friend.

UP TO **248miles**
URBAN RANGE AUTONOMY

ONLY **30min**
TO CHARGE 62miles

UP TO **50%**
SAVINGS ON MAINTENANCE COST

UP TO **7.2t**
GROSS VEHICLE WEIGHT

UP TO **3.5t**
TOWING CAPACITY

UP TO **15kW**
ELECTRIC PTO
(POWER TAKE-OFF)

VERSATILE

Up to 3 batteries / Up to 111kWh
Upgradable during vehicle's life

COMPLETE

Van up to 20m^3, cab full range, crew cab and minibus

Single and twin rear wheels, from 3.5t to 7.2t

4.2t can be driven with Cat B driving licence

ROBUST

Electrified modular chassis platform

Body on frame

Rear-wheel drive

AIR-PRO intelligent suspension

CAPABLE

140kW, 400Nm motor

Hi-Power for a boost of additional power

Eco mode for energy saving

15kW ePTO

CONNECTED

Charging and climate controlled remotely

Range optimisation, energy management and uptime

eDAILY Routing app

IVECO DRIVER PAL

Access all areas, no limits, with the best van in town.

Capable, safe and **user friendly**.

Whatever your mission in town may be - to load, deliver, sell or build - eDAILY is your best solution for emission-free and noise-free urban travel.

eDAILY is as versatile as Daily: it offers the same cargo volume, payload, agility and flexibility as the diesel version.

The driving mode selector allows you to either extract maximum power or **minimise energy consumption**.

One Pedal Drive mode makes urban driving easier and converts brake kinetic energy into electricity reducing eMotor energy consumption.

With eDAILY you have all your creature comforts; including the AIR-PRO intelligent pneumatic suspension which offers a 25% vibration reduction, as well as all of the technologies and features of Daily that you are used to.

Energy for your daily routes.
And up to 50% savings on maintenance cost.

The range that
your business commands.

Modular battery installation allows you to align eDAILY's range with the scope of your mission.

Rapid acceleration and up to 75miles/h maximum speed give you all performance you need on extra-urban routes. If you need power – for example, when overcoming another vehicle – you can get more boost with eDAILY's distinctive **Hi-Power** function.

eDAILY is fully connected and enables you to remotely control charge and climate – and to optimise range, drivability and uptime.

RANGE				
35S	**WLTP**	75miles	145miles	
42S	**WLTP**	68miles	125miles	185miles
50C	**WLTP**		115miles	160miles
72C	**WLTP**		75miles	110miles

Tested in all weather conditions
from -30°C to +50°C.

eDAILY is the result of 10 years of experience since it was first launched as an electric LCV on the European market. Design learning has also incorporated **real-mission feedback** coming from Customers.

During the development phase, the system was successfully tested in extreme conditions, from -30°C (-22°F) to +50°C (+122°F).

Hi-tech, electric-specific solutions allow **competitive operational costs**, with significant reduction in repair and maintenance expenditure versus diesel.

Range is calculated in WLTP test procedure simulation. The following conditions apply: batteries at beginning of life and fully charged, battery cell temperature 23°C, vehicles set in Eco Driving Mode and in Standard Regenerative Mode with no ADAS, air conditioning or heating. Reference models are: 35S VAN H1 WB 3520, 42S VAN H1 WB 3520 for 1 and 2 batteries, 42S VAN H2 WB 4100 for 3 batteries, 50C VAN H2 WB 4100, 72C VAN H2 WB 4100, with class A tyres and mechanical suspension. Estimated ranges may change after completing the homologation process.
Actual range can vary depending on various conditions such as external elements, driving behaviour, vehicle maintenance, age of the lithium-ion battery.

The whole line-up. Nothing missing.

		Height / Load volume				
		H1 (1545mm)	H2 (1900mm)	H3 (2100mm)	Gross vehicle weight (tonnes)	
					MIN.	MAX.
Wheelbase (mm)	Vehicle Length (mm)

3520L	6109	-	12.0m³	13.4m³	3.5	4.2
4100	7274	-	16.0m³	18.0m³	3.5	7.2
4100L	7669	-	17.5m³	19.6m³	5.2.	7.2

	Single wheel				Twin wheel			
Wheelbase (mm)	Body lengths (mm)		Gross vehicle weight (tons)		Body lengths (mm)		Gross vehicle weight (tonnes)	
	MIN.	MAX.	MIN.	MAX.	MIN.	MAX.	MIN.	MAX.
3000	2510	3000	3.5	3.5	-	-	-	-
3450	3395	3886	3.5	4.25	3395	3886	4.2	7.2
3750	4005	4495	3.5	4.25	4005	4495	4.2	7.2
4100	4005	4495	3.5	4.25	4005	4895	4.2	7.2
4350	-	-	-	-	4830	5340	7.2	7.2
4750	-	-	-	-	5690	6190	7.2	7.2

All body variants up to 7.2t GVW
single wheels / twin wheels.

Some say electric vans are only suitable for door-to-door missions.
eDAILY thinks different: electric means the future - and the future comes in all body variants.

eDAILY is offered in van, cab, crew cab, chassis cowl and people transportation versions, and is confirmed as the most versatile and complete base for conversions, offering a wide combination of wheelbases and gross vehicle weights.
No parts protruding from the upper frame and digital and analogic interfaces (as in example the CAN BUS 2.0B) make eDAILY the **most versatile and complete EV base for conversions**.

eDAILY is the only electric LCV to offer **alternative rear axle ratios** on the 50C (3.6 or 4.44) and 72C versions (4.3 or 5.13) to optimise either performance or efficiency.

Any mission you can think of. Including yours.

Uphill start guaranteed up to 30% gradient.

All bodies, all conversion opportunities, **all missions**.
And the same versatility as the Daily you know, thanks to the **modular battery sets** that allow for weight / range optimisation.

An **ePTO up to 15kW** is available to provide energy for refrigeration, cranes, other superstructures.
Power supply from the traction batteries make it possible to use the ePTO **even when the eMotor is switched off**.

If you plug your vehicle in to a domestic or industrial socket (or a charging column) **you can use energy from the network to supply your equipment**.

		37kWh	74kWh	111kWh

Zero emissions
meet maximum load.

The only electric LCV

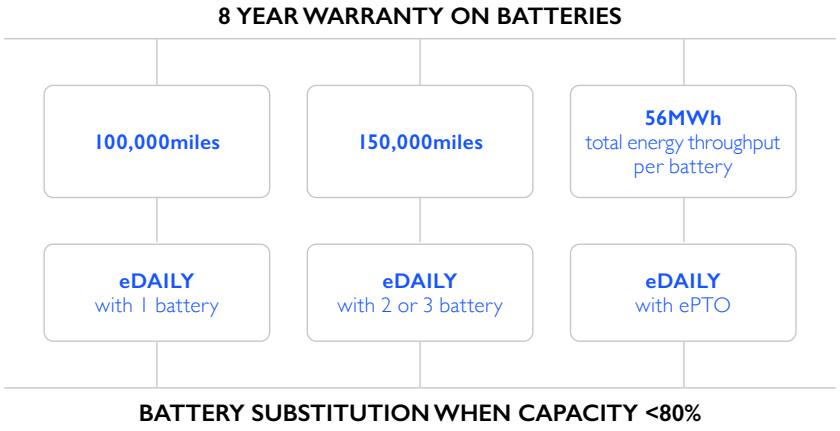
- with up to 20m^3 cargo volume
- with up to 4.6t payload
- with up to 3.5t towing capacity

Body on frame

High-end energy
with scalable batteries.

8-year and up to 150,000mile
battery warranty.

eDAILY can be equipped with 1,2 or 3 modular batteries, and the configuration can be upgraded during the vehicle's life.
The FPT Industrial 37kWh modular battery has a great cell energy density (265Wh/kg), which translates into best-in-class 95% ratio between installed and usable energy.



Easy-access front charging plug
with different charging options.

The eDAILY charging plug is easily accessible from whatever direction the cable is coming. Behind the flap which protects the plug from water and dust, a LED indicator shows the status and level of charge.
eDAILY can be charged in every situation, connected to charging columns, industrial sockets and home sockets.
Fast charging up to 80kW adds 60miles of range in 30 minutes.
All charging options can be managed via the app.

STANDARD	Mode 2/3 on-board charger **AC 11kW** **(Time for full charge)**	3 h 10'	6 h 20'	9 h 30'
OPTIONAL	Mode 2/3 on-board charger **AC 22kW** **(Time for full charge)**	1 h 30'	3 h 10'	4 h 50'
OPTIONAL	Mode 4 off-board DC FAST CHARGE **DC 40kW** (1 battery) **DC 80kW** (2/3 batteries) **(Time for 20% - 80% of battery charge)**	30'	30'	50'

Indicative times in standard conditions, with an approximation to ten minutes

A sustainable vehicle
for the digital era.

Always connected
for productivity and well-being.

eDAILY's e-services start before you buy. IVECO advises you on the vehicle and charging configuration that best suits your needs.
The connectivity box allows real-time data exchange and enables access to **IVECO services,** specifically developed to make working with eDAILY a relaxing, profitable and safe experience.

IVECO DRIVER PAL

VEHICLE HEALTH CHECK
"Alexa, ask MYIVECO the battery charge"
"Alexa, ask MYIVECO the status"

SETTING NAVIGATION
"Alexa, ask MYIVECO to search for a charging station nearby"

CABIN CONTROL
"Alexa, ask MYIVECO to turn on the cooler"
"Alexa, ask MYIVECO to schedule a recharge"

THINGS TO TRY
"Alexa, open MYIVECO!"
"Alexa, ask MYIVECO where my vehicle is!"

Activate the IVECO DRIVER PAL Skills directly from the IVECO ON Easy Daily app, just follow the steps on the tutorial. It is easy!

Best eMobility experience.

eDAILY offers you a natural and intuitive e-mobility experience while ensuring zero emissions, maximum energy efficiency and perfect fit with your mission.
IVECO has partnerships in place with leading European energy companies able to **design, supply, install and service customised charging solutions,** and offer favourable **energy contracts.** This allows customers to **minimise their initial investment** and **energy expenses during operation**.
IVECO has developed e-mobility services like **intelligent charging control** that enable you to schedule charging at the most convenient times. **Remote climate control** allows the vehicle to reach the ideal cab temperature before disconnecting the plug. **Driving and regenerative modes** can be pre-set by the fleet manager to optimise energy use.
Energy usage monitoring calculates energy absorption moment by moment (taking into account ePTO usage) and provides detailed reports on energy used versus distance travelled.

Charging equipment design, supply installation & service

Mobile app with intelligent energy control
- Charging schedule
- Cab pre-conditioning
- Remote setting of ePTO, driving & regenerative modes

Energy usage monitoring

Top productivity & efficiency.

Intelligent navigation plans **the best route to your destination** also taking into account where the nearest charging stations are. **Fleet managers can track each one of their vehicles at any time** while also monitoring their working status. Both driver functions and fleet management services are accessible via any connected device.
The **eDAILY Routing app** interacts with the vehicle to predict (with best-in-class precision) the **range**, the charge required to arrive at the destination and the **exact arrival time** – including a charging stop if necessary.
Range assurance alerts inform the Fleet Manager proactively when the remaining charge of the battery is getting close to the limit or when a problem affects the charging process.
New eDAILY dedicate features on **IVECO ON web portal**: enhanced fleet management with vehicle remote control, recharge and preconditioning scheduling.
New dashboard on energy management and real time vehicle data.
Dedicated Professional Reporting.

Maximised uptime.

eDAILY offers **Repair & Maintenance tailored to your mission**, allowing you a profitable and stress-free electric experience.

Repair & Maintenance

Control Room & Dealer Support

Proactive & Predictive Diagnosis

Over-The-Air Updates

Remote Assistance

Real-time data generated from the vehicle are monitored remotely – and in case of any inconvenience the nearest IVECO Service Point will be instantly activated for support.
Proactive and predictive diagnosis avoids unplanned stops and allows timely scheduling of best-quality maintenance. Service appointments can be immediately booked online.
On-board software is regularly and seamlessly **updated over-the-air**.
At **IVECO Service Points** you will find highly professional, electric-trained staff to ensure the full efficiency of your vehicle at all times.

REPAIR & MAINTENANCE CONTRACTS

Maintenance	**Maintenance, lubrication and change of oil and fluids as indicated in the R&M manual**
Drive line	**Repairs to eMotor, axles, inverter, CMU (Charging Management Unit)**
Extra drive line	**All repairs not covered by the drive line contract (chassis, e-suspensions, electrics, braking system)**
Wear	**Brake discs & pads**

Safe & comfortable drive.

eDAILY promotes the engagement in sustainable and efficient driving. eDriving Style Evaluation offers real-time tips for energy savings and range increase. Dedicated reporting provides information on the improvements achieved.
The vocal driver companion **IVECO DRIVER PAL** makes the life and work of eDAILY drivers smarter, easier, more enjoyable and more productive. It also handles brand-new interactions such as requests on **vehicle range, work schedules and charging stations.**

IVECO DRIVER PAL vocal driver companion

An all-round model
for sustainable transport.

Electric is more than a vehicle: it is an eco-system in which vehicle, solutions and services are digitally interconnected. This allows customers to find their own way to e-mobility, maximising energy efficiency and ease of use.
IVECO accompanies you throughout your e-journey. All the phases of your electric experience are covered: from vehicle financing to the design of the appropriate infrastructure, energy contracts and specialist electric assistance.

Integrated charging infrastructure.

Complete your eDAILY package with a certified charging infrastructure designed, supplied and installed to maximise your vehicle's performance and minimise energy expenses during operation.

Charging equipment installation & warranty

Advisor service with site inspection and customised infrastructure design

Supply, operation and service

IVECO CAPITAL financial solutions.

All traditional financial products (including contract hire, operating lease, finance lease and hire purchase*), together with innovative, electric-dedicated services – packaged in the most suitable solution for your business.
IVECO CAPITAL is the captive financial services Brand of the Iveco Group, and offers a full range of financing, leasing and rental services* for eDaily as well as for conversions. Financial packages can include IVECO ON premium services*. Possibility to finance the vehicle with EW and R&M*.
For a tailored offer contact your IVECO Dealer or IVECO Direct Sales.

All Financial formulas for fleet, retail & converters

Drive the road of change

PUBLICATION L2229201UK - 11/22

The information contained in this brochure is based on the best data available to Iveco Group following its internal tests and simulations, pending the vehicle homologation, therefore the information concerning availability and capabilities may be subject to change. Officially homologated driving range will be published closer to the vehicle's sales date, moreover, in every case, the data may vary due to various factors (e.g. truck equipment, driving style, weather conditions, route mission, vehicle condition, age and condition of the lithium-ion battery).
